- 2. The prior art of record fails to teach or render obvious the overall claimed invention of a system or method for delivery of a drug to a patient comprising: a tread generator for analyzing the breath information and the characteristics of the patient's breathing over a number of treatment, wherein the breath information includes a number of breaths per minute and a mean tidal volume, and wherein a data analyzer calculates a minute volume value by dividing the number of breathes per minute by the mean tidal volume along with other limitations of the claim.
